# Croozzer

winter oilseed rape

We have further improved oilseed rape varieties progressing in private and official trials which are candidate varieties in AHDB winter oilseed rape trials for harvest 2019.

In trials so far, Croozzer is in the same clubroot-resistant category as Mentor and Crome, with excellent yield potential and the added benefit of a likely '9' rating for stem canker.

Croozzer is not offered for sale at this stage. For information Please contact [info@lspb.eu](mailto:info@lspb.eu)
