

# Oilseed Rape

# Resort

winter oilseed rape

We have further improved oilseed rape varieties progressing in private and official trials which are candidate varieties in AHDB winter oilseed rape trials for harvest 2019.

Resort is a high erucic acid rape (HEAR) variety intended for specialist use in industrial processes.

Further information will be published when available.

Resort is not offered for sale at this stage. For information Please contact [info@lspb.eu](mailto:info@lspb.eu)
