

Oilseed Rape

Wembley

winter oilseed rape

Wembley is Fully Recommended by AHDB for the East/West region in 2019/20. It has high gross output both treated and untreated, a consistent performance over its five RL trials years, good agronomic characteristics with a high oil content.

- ✓ Wembley has good stem stiffness and high resistance to lodging.
- ✓ Wembley has very good resistance to light leaf spot, equal to the best on the RL.
- ✓ Wembley is early to mature, equal to the earliest on the RL.
- ✓ Wembley has good autumn vigour, spring vigour and early flowering time.

Gross output, agronomic characters, disease resistance and seed characters	Wembley RH	Alizze RH	Windozz RH
Gross output as % treated control (E/W)	102	102	104
Untreated gross output as % untreated control (UK)	104	101	101
Resistance to lodging	8	8	8
Stem stiffness	8	8	8
Plant height (cm)	153	153	150
Earliness of flowering	8	8	8
Earliness of maturity	6	5	5
Resistance to light leaf spot	7	7	5
Resistance to stem canker	5	5	5

Data source: AHDB Recommended List of Winter oilseed rape 2019/20.
1-9 scales where a high figure indicates that the variety has the character to a high degree.
